Objective

As a Front-End Web Developer, I aim to blend creativity and technical proficiency to craft seamless and visually captivating user experiences. Committed to staying current with industry trends, I aim to contribute innovative solutions and collaborate within dynamic teams to elevate web development projects.

Skills and Technologies

Technical Skill -

Expert   :- HTML, CSS, Tailwind CSS, JavaScript, React.js, Node.js, Firebase

Comfortable   :- Next.js, MongoDB, Express.js

Familiar   :- Stripe, JWT

Tools   :- Github, VS Code, Netlify, Vercel, Canva

Projects

Blood Sync (Team Project)   Live Demo | Client | Server
Features :-
- If the user needs blood, they can request the blood on the Blood Sync website and the administrator will work to manage the blood.
- When the user requests blood, the notification will be based on the blood group. If the admin accepts the request, it will be submitted to the All Requests page.
- After giving blood, no donor can give blood for 3 months. If the donor wants to give blood before 3 months, a notification will come that he cannot blood.

Used Technology :- JavaScript, Next.js, Express.js, MongoDB, Node.js, Stripe, Axios, Firebase, CSS, Tailwind CSS, Swiper.js, Daisy UI

Daily Shopping (Grocery Type)   Live Demo | Client | Server
